

channel 12 mini on colds w physicist
virus have bumps that antibodies
bump--imp that it's onomatopoeia wd
accomodate and then viruses
change bumps etc
they look like geodesic domes
my beginning ideas, more or less, become the cold
don't resist etc: nothing orig there

poems about viruses

idea is that poet can find the nub(s) that
researchers can follow

can't help feeling that lots of trouble everywhere is in lang--
esp way ?s are framed--its bumps don't fit etc

get recent biol text or microbiol or viral etc and read
